Lorraine Kim

Product Designer

San Mateo, CA · lorraine.kim@gmail.com · 347-271-2651 · lorrainekim.com · linkedin.com/in/lorrkim

Product designer for complex financial workflows, with fifteen years in institutional finance: buy-side trading operations and supporting asset managers on Bloomberg's order management system. I research, design and build in code, and test with real users and data.

SELECTED PRODUCT WORK

FXpress · Exchange-rate widget for people who send money abroad — Live · Nov 2025 – Oct 2026

- Designed and built a widget that shows where today's rate sits in its 30-day range across 18 currency pairs, then links to the sender's own provider.
- Interviewed 4 senders and tested with 5. All 5 completed the send flow; I fixed the button hierarchy and the threshold field where testers got stuck.
- Kept every calculation in code and limited the AI assistant to rewording a sentence the code had written, with a check that rejects advice or a changed meaning.
- Used live logs to find that the 30-day comparison read "low" in 68 of 75 readings during a steady trend, and changed the copy.

ReconLayer · Reconciliation add-on for small middle-office teams — Working prototype · 12 weeks

- Designed and built a Google Sheets add-on that compares internal and broker files, classifies breaks with fixed rules, and drafts counterparty emails for the analyst to review.
- Interviewed 5 practitioners across 4 buy-side firms and tested with 5 operators. 4 finished, with an average ease rating of 4.75 out of 5.
- Showed missing trades separately from value differences so they don't sink to the bottom of a ranked list.
- Revised the email prompt three times to stop the model guessing at the cause of each break.

Hwang Yoo-Yup Archive · Website for a Korean modernist painter's estate — Paid client · 9 weeks · Live

- Designed the information architecture, visual system and curatorial copy, and built the site in Framer: a thematic path for newcomers and an archive mode for researchers, in one site the estate can maintain.

DESIGN EXPERIENCE

OOJOO Studios · Product Designer (independent studio), San Francisco — 2024 – Present

- Research, design and build financial tools and client websites, prototyping in code with Claude Code and Cursor. Build Figma component libraries, variables and design tokens.

INSTITUTIONAL FINANCE (NON-DESIGN ROLES)

Bloomberg · AIM Trading Analyst, San Francisco — 2020 – 2022

- Supported buy-side clients on Bloomberg AIM, diagnosed trading-workflow issues, and tracked fixes with Product and Engineering in Jira.
- Turned recurring client issues into product requests that were adopted into AIM.

Mizuho Alternative Investments · AVP, Trading Operations, New York — 2009 – 2020

- Re-engineered reconciliation processes for an $8B AUM multi-strategy platform, cutting operational cycle time by 25%. Owned requirements through UAT for system upgrades.
- Managed post-trade settlement and cash forecasting across equities, fixed income, futures, FX and swaps.

AllianceBernstein · Associate Portfolio Manager, New York — 2007 – 2009

- Managed FX-derivative hedging and risk analytics for institutional equity portfolios.

SKILLS

Product & UX: User research, usability testing, workflow mapping, information architecture, interaction design, prototyping
UI & systems: Figma, components and variants, variables, design tokens, responsive design
AI & build: AI interaction patterns, prompt design, Claude API, Gemini API, Google Apps Script, Claude Code, Cursor, Vercel, Netlify

EDUCATION

DesignLab · UX Academy, 2023 – 2024 · University of California, Berkeley, B.A. Legal Studies
