PRODUCT DESIGNER | UX/UI

Fintech · Financial Workflows · AI · Complex Systems

Product Designer focused on translating complex financial workflows into clear, trustworthy digital experiences. Combines hands-on 0→1 product design with 15 years of institutional financial-market expertise across trading, FX, reconciliation, risk management.

SELECTED FINTECH PRODUCT DESIGN

FXpress — AI Co-Pilot for FX Rates **2026**

0→1 · Consumer Fintech · Live Deployment

- Designed and deployed a consumer remittance product across 18 currency corridors using live exchange-rate data.
- Conducted user interviews and usability testing to refine transfer inputs, fee transparency, and primary send interactions..
- Designed AI interaction patterns with deterministic financial calculations, guardrails, and fallback states for missing data and response failures.
- Translated complex FX rates and fees into a transparent, user-controlled sending experience.

ReconLayer — Middle Office Break-Triage Tool **2026**

0→1 · B2B Financial Workflow · Working Prototype

- Reframed a complex reconciliation workflow into a break-triage experience designed around financial analysts' existing processes.
- Tested with 5 financial analysts and refined data-table structures, error messaging, exception states, and resolution flows.
- Designed a human-in-the-loop workflow separating rules-based break classification from AI-assisted dispute drafting.

PRODUCT DESIGN EXPERIENCE

OOJOO Studios, San Francisco **2024 - Present**

Product Designer

- Lead 0→1 product design for financial tools, from problem framing and workflow definition through research, prototyping, usability testing, and deployment.
- Use GenAI-assisted workflows and code prototyping to explore concepts, validate interactions, and build functional product experiences.
- Build reusable Figma component libraries, variables, and design tokens to support consistent, responsive interfaces.
- Design digital archives and client websites, translating complex content and stakeholder needs into clear information architecture and responsive experiences.

FINANCIAL PRODUCT & SYSTEMS EXPERIENCE

Bloomberg, San Francisco **2020 - 2022**

AIM Trading Analyst

- Partnered with institutional clients, Product, and Engineering to diagnose trading-workflow failures, isolate configuration issues, and track fixes through Jira.
- Translated recurring client pain points into product improvements and platform enhancements adopted into Bloomberg AIM.

Mizuho Alternative Investments, New York **2009 - 2020**

AVP, Trading Operations

- Redesigned reconciliation workflows on a quantitative multi-strategy platform supporting $8B AUM, reducing operational cycle time by 25%; translated user requirements into system upgrades and UAT.
- Managed post-trade settlement and cash forecasting across equities, fixed income, futures, FX, and swaps.
- Resolved complex data breaks and coordinated with brokers, custodians, Legal, and Compliance to resolve trade-lifecycle issues.

AllianceBernstein, New York **2007 - 2009**

Associate Portfolio Manager

- Managed FX-derivative hedging and risk analytics across institutional equity portfolios, accounting for client benchmarks and investment mandates.

SKILLS & SYSTEMS

Product & UX: End-to-End Product Design · Complex Workflow Design · Interaction Design · User Research · Usability Testing · Information Architecture · Workflow Mapping · Prototyping

UI & Systems: Figma · Components & Variants · Variables · Component Libraries · Responsive Design · High-Fidelity UI

AI & Prototyping: Human-in-the-Loop Design · LLM UI Integration · AI Interaction Patterns · Claude API/Code · GenAI Prototyping

Domain: Fintech · Trading · FX · Reconciliation · Post-Trade Operations · Risk Workflows · Regulated Financial Products · Institutional Finance · Edge-Case Design

---

EDUCATION

DesignLab, New York **2023 - 2024**

UX/UI Design Bootcamp

University of California, Berkeley

B.A. Legal Studies
